	\checkmark	Data is available to individuals authorized to access it.
		Data integrity ensures the data is consistent, complete, accurate and has been validated.

This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Recommendations:

- Provide and implement the identity and access management system so company can enforce policies on which employee can access which system or data
- Implement least privilege and segregation of duty principles to ensure confidentiality of the documents

- Implement strong password security policies with strong minimum requirement to ensure that it is hard enough for threat actor to breach the system to password cracking
- Implement data encryption system so sensitive information can be stored and transmitted securely
- Implement intrusion detection system (IDS) to detect anomaly early and notify the respective parties to take action
- Develop, implement and test backup and disaster recovery plan accordingly to ensure that organization can react appropriately when disaster or disruption happened
- Implement appropriate monitoring system and perform regular check on any notification and findings
- Establish procedure to react on any findings and notifications from monitoring system
